

Solutions for your Company's Success

Radiant offers enterprise-class IT infrastructure solutions that enable Canadian businesses to be more efficient and innovative.

Exceptional Customer Service

Responsive and reliable service delivery and support, all simplified under a single point of contact.

Customized Solutions

With a customized solutions approach to meet the unique needs of our customer, our team of experts implement and manage mission-critical networks, cloud hosting and Voice over IP solutions for many of Canada's most recognized brand name companies.

Leader in Compliance

Radiant is a proud Canadian service provider with PCI DSS compliance of both its core network and enterprise cloud computing environments.

Managed Networks

Secure Private Networks

A single source provider of secure Managed Network solutions that enable a more agile IT infrastructure including MPLS VPN, SSL VPN, IPsec VPN.

Network Monitoring

Cloud-based Network Monitoring service that provides enhanced visibility of network status using our Customer Portal and quick problem resolution, so you can maintain control of your network and save time to focus on core business activities.

Broadband Connectivity and Managed Failover

Partnering with ISPs all across Canada and the US delivering the largest internet footprint in Canada. Our fully managed diverse failover solutions maximize network uptime and performance at all locations, so business can continue to function as normal, even if primary circuits are down.

Enterprise Cloud Hosting

AlwaysThere™ Virtual Data Centre

Radiant's secure vCloud® Powered Virtual Data Centre solutions provide flexible allocation of dedicated cloud computing resources when and where you need them.

AlwaysThere™ Dedicated Virtual Exchange

Customizable Hosted Exchange solution with the high availability, security, transparency and control requirements organizations expect.

Microsoft® OFFICE 365™

All your office needs to get your work done wherever you go.

Voice Solutions

Hosted PBX

Radiant's Hosted PBX is a cloud-based Voice over IP (VoIP) phone system with everything included so no equipment purchase is required.

SIP Trunks

Eliminate and consolidate your traditional phone lines with your data network with the flexibility to scale on demand over a single IP.

Digital Business Lines

Simple, affordable 'dial tone' that interconnects with an existing phone over an Radiant private network connection.

As a leading provider of customized managed network, cloud hosting and Voice over IP solutions, Radiant has the expertise and experience you can trust to deliver secure, reliable and scalable high-performance.
